PROFESSIONAL EXPERIENCE & EDUCATION

Self-employed software engineer and consultant

Ango IT Solutions e.U. since 07.2018

IT internship

ANDRITZ HYDRO GmbH. 07.2015 - 09.2015

HTML CSS JavaScript PowerShell
SharePoint 2013 MS Report Builder

Creation of an IT-FAQ in SharePoint 2013 with custom CSS and JavaScript functionality, as well as development of a platform to manage orders and printing of a company-internal brochure.

IT internship

ANDRITZ HYDRO GmbH. 03.2015 - 05.2015

HTML CSS JavaScript VB-Script
C# ASP.NET 3.5 MS SQL

Design and implementation of a self-service portal for ANDRITZ employees as well as adding new features to an existing web application.

IT internship

ANDRITZ HYDRO GmbH. 06.2014

HTML CSS JavaScript SharePoint 2010

Design and implementation of a web application to display points-of-interest inside the ANDRITZ company building, as well as creation of an IT-FAQ for ANDRITZ employees.

Software engineer

11.2015 - 10.2017 IT Finance Consulting GmbH.

AngularJS Bootstrap 3 Java EE MS SQL
Tomcat REST Architecture

Implementation of a web application to manage leasing assets within the banking sector, which is used by 13+ CEE countries. Tasks included the creation of specifications and mockups with the customer, as well as the implementation of requirements in the frontend and backend.

Bachelor's degree in "Computer Science"

06.2015 FH Technikum Wien

Software engineer

11.2014 - 12.2014 ANDRITZ HYDRO GmbH.

HTML CSS JavaScript VB-Script

Redesign of of an existing web application's frontend.

School leaving examination

06.2011 HLW 10

PROJECTS

Replacement of the legacy core system for an international lottery supplier

 1 year 01.2019 - 01.2020

Java EE Oracle WebLogic Oracle RDBMS
Domain-Driven Design Microservices
Docker REST Architecture

New edition of the core system for managing lotteries worldwide. Focus on player account management: player data, lottery data, subscriptions, customer cards, and prize payouts. Technical specifications and basic system architecture were given.

Responsible for the implementation of the specifications as part of a 6-member backend team. Additionally, independent conception and implementation of REST endpoints for and in cooperation with the UI team.

In-house invoicing and accounting system

 6 months 06.2018 - 12.2018

Angular Angular CLI Angular Material
Java EE Google App Engine MySQL
REST Architecture

Web application to manage invoices, time tracking, and contact details in order to keep the administrative effort as a freelancer as low as possible.

Supports features such as automatic PDF generation of invoices, emailing of PDF invoices, and consolidation of invoices for a specific month.

Asset management system for a major bank

 2 years, 3 months 10.2017 - 01.2020

AngularJS Bootstrap 3 Java EE MS SQL
Tomcat REST Architecture

Web application that is part of the product portfolio of my former employer *IT Finance Consulting GmbH*. Allows centralized management of leasing assets and is currently in use by 13+ CEE countries. Covers the entire leasing lifecycle: initial evaluation, contract conclusion, and remarketing.

Tasks as an employee included the conception and implementation of new features, as well as the adaptation and optimization of existing functionality. Responsibility over the entire codebase as the predominantly sole software developer in the project team.

Subsequently, realization of isolated features and consulting activities as freelancer.
